

Disability Services

Registering with Disability Services is an interactive process that involves student self-report and a Disability Services specialist's observation and interaction. Documentation may be requested from external sources (e.g., documentation from a healthcare provider). To begin the process, complete and submit the Disability Services intake form and submit any disability/accommodation documentation that you have and think is appropriate.

In the event that you do not have documentation, contact our office to consult with a Disability Services Specialist to discuss next steps.
